

Histograms of MSE's at 10 Hz

Input: Sample of accident videos, 40 avi's, 5 sec, originally recorded at 25 or 29.97Hz

The clips are at the start of the accident

Model: pretrained prednet model

Overall: distribution of mean MSE's for each clip, averaged over frame

Followed by distribution of MSE's for each frame

Please note: the scales for the x-axes (MSE's) are matched to more easily compare across frames

Please note: the label of the y-axis is wrong; there were a total of 40 clips.
