Histograms of MSE's at 2 Hz

Input: Sample of accident videos, 40 avi's, 5 sec, originally recorded at 25 or 29.97Hz The clips are at the start of the accident

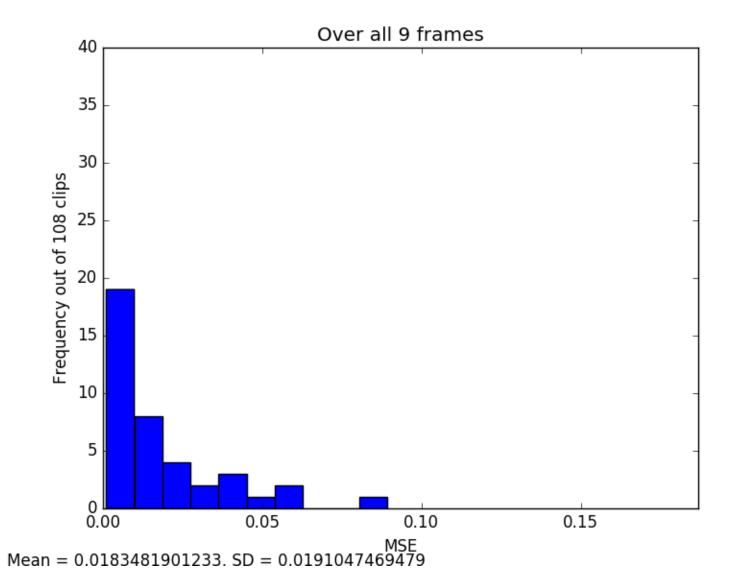

Model: pretrained prednet model

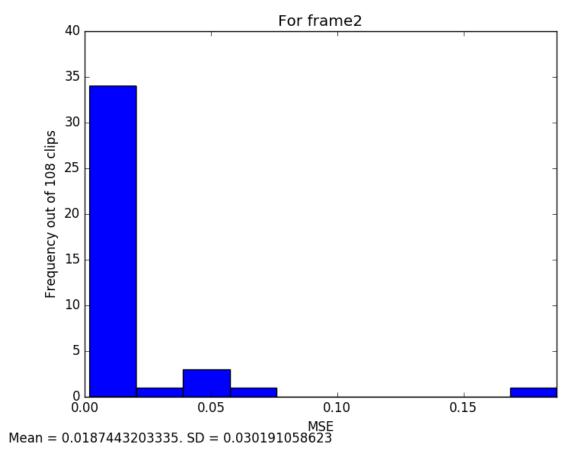

Overall: distribution of mean MSE's for each clip, averaged over frame

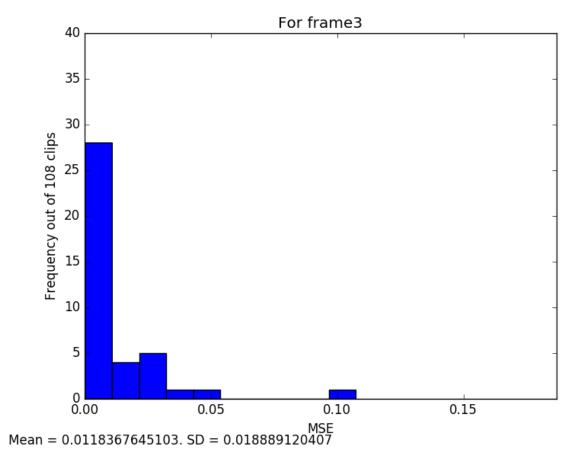

Followed by distribution of MSE's for each frame

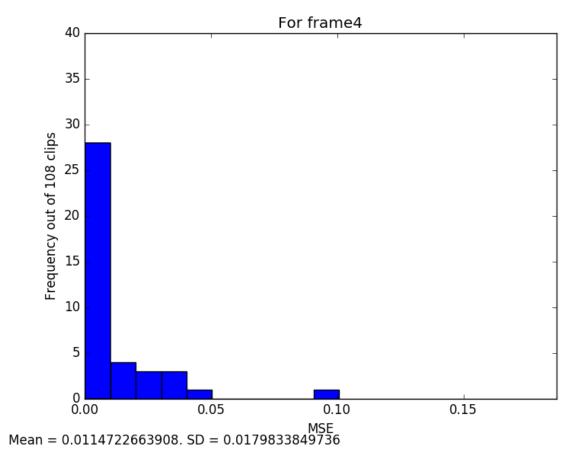

Please note: the scales for the x-axes (MSE's) are matched to more easily compare across frames

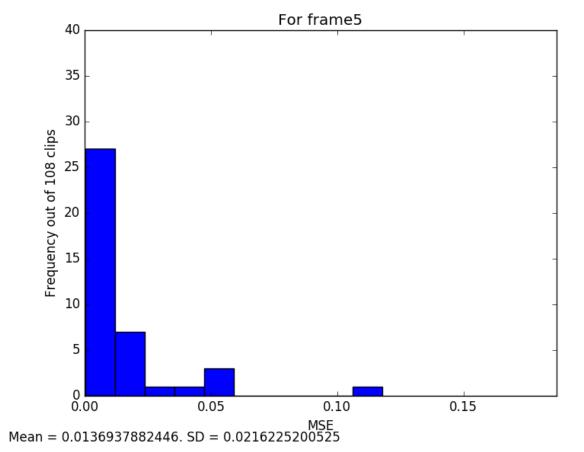

Please note: the label of the y-axis is wrong; there were a total of 40 clips.

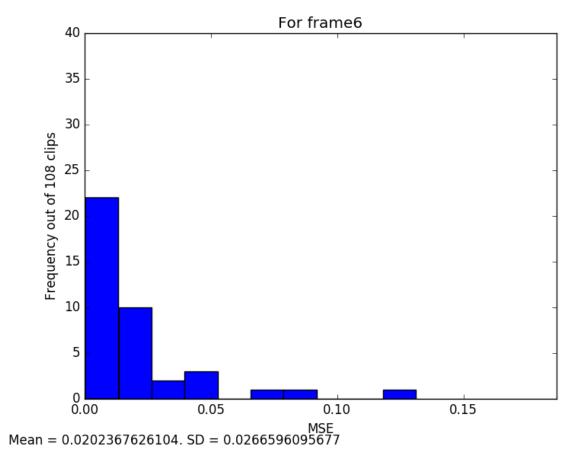

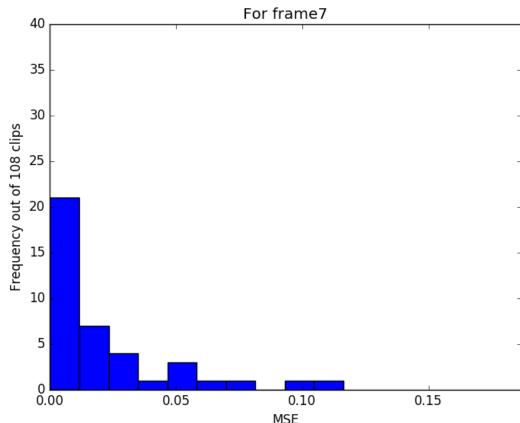

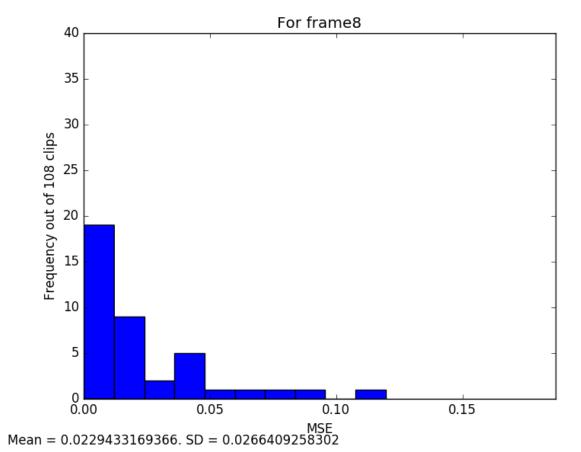

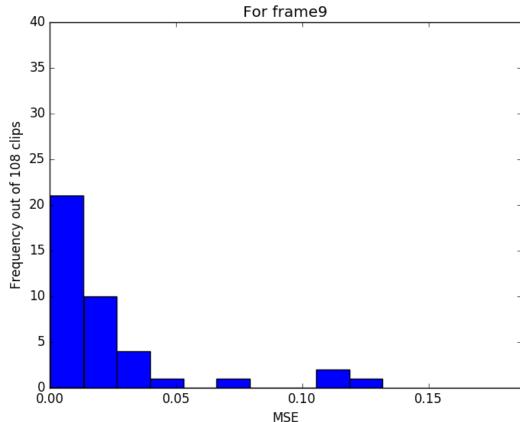

MSE Mean = 0.0223017677321. SD = 0.0265960079618

 $\begin{array}{l} \text{MSE} \\ \text{Mean} = 0.0227631315244. \, \text{SD} = 0.0311248491871 \end{array}$
